BREAKILL'S
ALIEN LAB

# COILBOOK

# WARNINGS

This product is designed for advanced vapers, for 0 nicotine juices. you must understand Ohm's Laws and your own device's limits. Use only with High drain Cells, in parallel when required.
Mount the coils without touching the deck or the cap, staying as closer to the post poles as possible.
Pre-fire ohm reading may be very low due to the natural hotspots occuring before firing; the first activation msut be done at low watts, Generally speaking, it's suggested 10w for activation of MTL aliens, 25w for flavour chasing coils, and 45.50 for cloud chasing setups.
If prefire ohms reading is too low to be used on regulated mod, activate them on a mechanical devices, with a full charged  battery by rapid short activation to identify the hotspot and remove them. Parallel batteries devices are highly suggested
When the coils lights up uniformly, from inside to the outside wick the coil. it's important to wick VERY hard these coils, aiming to an high density wicking inside the coil, leaving the bottom of the coil free to breathe.
I'ts important to dryburn your coil; if possible, wash and gently brush the coils before.
MTL: After max 10 ml of usage
Flavour: after max 30 ml of usage
Cloud: after 30-50 ml of usage

NEMBO

Breakill's Alien Lab provides high quality coils for almost all RDA/RTA in the market, handmade in Italy with the renowned wire Nembo® 80.
All coils are EU CE/RoHs compliant , and receive thorough cleaning via an ultrasonic cleaner for the best quality and immediate flavor response. All coils are tested first in Mech mods, then in chipped mods to guarantee the best performance, battery life, and coil duration through a full range of devices.
The renowned alien wrap characterizes all of our products; Combined with a perfect balance of wire gauge ratios offers a dense, creamy, flavorful vape, from which you"ll never want to use anything else.
All Nembo products are avaible at
